

MIMIC-IV-Ext-CDM 1.1
2,400 admissions with one of four conditions; LA-CDM's 80/10/10 split
appendicitis 957, cholecystitis 648, pancreatitis 538, diverticulitis 257

MIMIC-CDM-OW (this work)
MIMIC-IV 2.2 + Note admissions with abdominal pain, built with CDM's own text pipeline
713 OTHER cases in 9 non-CDM diagnosis groups; 648 same-pipeline in-set controls

PATIENT-DISJOINT COHORTS

training

No training case shares a patient with an evaluation case.

- Closed world**
accuracy, mean-class accuracy, coverage, selective accuracy, risk-coverage (AURC), ECE, Brier
- Clinical safety**
unflagged and confident errors, severity-weighted error, deferral precision and recall, tests and dollars per case
- Open world**
false commits, deferral, naming OTHER, OOD AUROC; per diagnosis group
- Statistics**
95% case-level bootstrap intervals (2,000 resamples); paired bootstrap for every comparison
